DESCRIPTION

Emergency Department (ED) visits for non-traumatic dental conditions per 100,000 population, for individuals ages 5 years and older.

[NOTE: The software provides the rate per population. However, common practice reports the measure as per 100,000 population. The user must multiply the rate obtained from the software by 100,000 to report visits per 100,000 population.]

NUMERATOR

ED visits (within state), for patients ages 5 and older, with a first-listed diagnosis of caries, gum disease, oral soft tissue conditions, caries, gum disease, oral soft tissue conditions, dental conditions not elsewhere classified and not otherwise specified (includes tooth pain) for patients residing in a community (**DENTALVISIT** *).

NUMERATOR EXCLUSIONS

Exclude visits:

- With any listed ICD-10-CM diagnosis code for facial trauma (**TRAUMATOFACE** *)
- With missing gender (SEX=missing), age (AGE=missing), first-listed diagnosis (DX1=missing), or county (PSTCO=missing)

DENOMINATOR

Population ages 5 years and older in the metropolitan area¹ or county. Visits in the numerator are assigned to the denominator based on the metropolitan area or county of the patient residence, not the metropolitan area or county of the hospital where the discharge occurred.

¹ The term “metropolitan area” (MA) was adopted by the U.S. Census in 1990 and referred collectively to metropolitan statistical areas (MSAs), consolidated metropolitan statistical areas (CMSAs), and primary metropolitan statistical areas (PMSAs). In addition, “area” could refer to either 1) FIPS county, 2) modified FIPS county, 3) 1999 OMB Metropolitan Statistical Area, or 4) 2003 OMB Metropolitan Statistical Area. Micropolitan Statistical Areas are not used in the AHRQ QI software.
